INTEREST

- Coding   - Drawing
- Writing   - Designing

These are my fortes, therefore I have spent a lot of time honing them ever since I was little.

SKILLS

NodeJS(Express, Handlebars, Typescript)

Expert In development of highly Scalable and maintainable application and APIs using node js and express

PHP (Laravel, OOP)

Over 3 years of experience in developing Web Apps and APIs using php and laravel

React JS (NextJS, Redux, Saga, ReactNative)

Mastered the component based approach of ReactJs for over 3 years and successfully built and deployed highly scalable applications, both for web and **Mobile.**

DBMS (Postgres, MYSQL, MongoDB, SQlite)

After Years of database Administration, I've come to understand the intricacies of databases and learnt to choose from the vast options the right database for every project.

Other Front End Libraries (SvelteJs, JQuery, Bootstrap, Material UI, Fluent UI)

An artist with limited color in his/her painting toolset has limit to what he can paint, likewise an engineer with little toolset. Over my years, i've learnt and mastered the use of different UI libraries both Javascript and Css to make my work easier and provide the right standards for each project.

Others (Git & Github, NPM, Testing With Jest, Web Hosting, Cloud Service Deployment)
